HTML TASK

a. What is HTML? Give basic structure of the HTML page.

HTML stand for Hypertext Markup language. It is used for creating web pages and also describes the structure of the webpages.

Structure of the HTML:

```
<html>
<head>
        <title> </title>
</head>
<body>
</body>
</html>
```

b. Difference between inline and block level element.

Inline Level Element	Block level Element
Occupies only necessary width	Occupies full available width
Does not start on new line	Start on new line
Examples: <a>, <span>	Examples: <div>, <p>
Allow other inline elements inside	Allows both inline and block elements
